About special projects

It is our goal to turn your ideas into real working solutions in close cooperation with you. To realize this we follow our [New Ideas Process](#).

Step 1 of the New Ideas Process

Ideas with future business value and potential will be selected for further elaboration and move to status special project. A special project usually starts with a special interest group (SIG) formed by customers who are very close involved with the solution/product combined with Onetrail employees.

In close cooperation they will further elaborate the idea and develop a minimal valuable product (MVP) and customer business case. Special projects have the potential to become a new Onetrail product or module when the MVP results in a positive business case.

Special projects

Software License Ordering

Enable automated software license ordering

Proof of delivery

Enable exchanging the proof of delivery

Build to Order - Ordering

Enable build to order ordering

Supplier performance dashboard - order status

Dashboard for buyers to track performance indicators of connected suppliers

Product Data Index Quality

Improve the current way of product indexing

Reservation Orders

Enable exchanging reservation orders

Development Roadmap > 2021 and further

This roadmap shows our product development epics and goals for the upcoming months.

Goal	
<div> <div>TPNRM-202 New Product Exchange</div> <div> <div>TPNRM-206 New Supplier Product Exchange process reporting</div> <div>TPNRM-203 New Supplier Product Exchange for CSV</div> <div>TPNRM-204 New Buyer Product Exchange for CSV</div> <div>TPNRM-205 New Buyer Product Exchange for XML</div> </div> </div>	<div> <div>NEXT</div> <div>DONE COR ZIJLSTRA</div> <div>NEXT</div> <div>NEXT</div> </div>
