

Reservation Orders

Status

FINISHED

The Reservation Order has led to surprisingly fast results and is already a complete and working feature. You can find more info on this on the [product page](#).

Introduction

The idea for exchanging reservation orders came out of the top-3 from the Battle. Onetrail is already supporting a kind of reservation orders, but it hasn't been implemented by the connected sellers yet, and besides that, the requirements can be different than the current implementation.

More info on the current implementation can be found here:
